

**Editor's Comment:**

1. There are some grammatical errors, like those at line-33, where “this may due to” should be corrected to “This may be due to”.
2. There are also some typographical errors, like those at line-35, where “parttly” should be corrected to “partly”.
3. There are some scientific errors, like those at lines-138, 139, since reduction of the silver ions ( $\text{Ag}^+$ ) of the silver nitrate ( $\text{AgNO}_3$ ) yields neutral silver ( $\text{Ag}_0$ ) atoms and not ions. Therefore, “silver ( $\text{Ag}_0$ ) ions” should be corrected to “silver ( $\text{Ag}_0$ ) atoms”.
4. At line-284, “The FTIR spectrum of *Bridelia ferruginea*” should be corrected to “The FTIR spectrum of SNPs”.
5. At line-292, “silver ions ( $\text{Ag}_0$ )” should be corrected to “silver atoms ( $\text{Ag}_0$ )”.
6. At line-348, the title of “Table 4” should be corrected to “Antibacterial activity of *Bridelia ferruginea* crude extract, silver nanoparticles biosynthesized from *Bridelia ferruginea* bark,  $\text{AgNO}_3$ , DMSO and Ciprofloxacin controls against test bacteria”.
