**PART 1: Review Comments**

|                                            | <b>Reviewer's comment</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | <b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)                                                                                                                                                                                                               |
|--------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b><u>Compulsory</u></b> REVISION comments | <p>Research topic: Authors should review it.</p> <p>Abstract: Authors should consider manuscript for corrections.</p> <p>Introduction: Lack unity; authors need to review accordingly.</p> <p>Methodology Authors should consider manuscript.</p> <p>Results: Authors claim to isolate 148 uropathogens from 63 subjects but never state any mixed isolates; it is confusing please clarify.</p> <p>Table 3 and 4 is repetition.</p> <p>Table 5, authors need to present antimicrobials report in percentage for proper communication to audience.</p> <p>All tables should follow results accordingly.</p> <p>Discussion: Consider manuscript.</p> <p>References: Journals should be abbreviated.</p> <p>Also, <i>et al.</i>, should be removed from references and state all authors.</p> <p>Grammatical errors should be corrected.</p> | <p>I agree with the reviewer and have affected the necessary corrections</p> <p>Table 3 shows the occurrence of the isolates in their genus level while table 4 shows the occurrence of the isolates at specie level.</p> <p>Since the mode of identification gives the isolates at specie level, we thought it important to note and show the isolate at specie level as well as genus level.</p> |
| <b><u>Minor</u></b> REVISION comments      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                    |
