Abstract, Introduction and Methodology: Authors should consider manuscript. Result: Authors claim to isolate 148 organisms from 63 subjects and did not state any mixed growth of isolates; it is questionable. Also, resistance rate of Tetracycline (74%) and Ceftriazone (78%) were not seen on the table. Authors should separate conclusion from recommendation. Authors should consider manuscript for other corrections.	A statistical package was not seen as necessary for this work as results were experimental and observational. Percentages and frequencies were more appropriate for the representation of the data obtained from this research work and this was appropriately done All corrections have been effected as stated by the reviewer and highlighted in yellow. Thank you
