SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	-----	
<u>Minor</u> REVISION comments	keywords: Instead of Ageing, elderly has to be written. In Table 3 & 4, th mean values has to be rechecked because the maximum possible score of Rosenberg self Esteem Scale is 40 but the mean score is more than that. Recheck the values and sometimes decimals might be kept wrongly. The Intervention and contro group samples were taken from same setting. How the researcher prevented contamination i.e exchange of informations. Grammatical errors has to be rectified.	Key words: reality therapy, self-esteem, the elderly mean values are rechecked. Using the inclusion and exclusion criteria, 50 elderly men were evaluated, and among them 30 persons were identified to enter into this study, and they were randomly assigned into two groups: experimental and control group. Grammatical errors has to be reformed.
<u>Optional/General</u> comments	Well written article
