SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	<p>The subject of the article is interesting. It would have been desirable if the sample size of the respondents was more important. Also some remarks seem necessary to improve the article.</p> <p>1- In the introduction of level: * I think it is interesting that the authors present statistics about high blood pressure and ocular hypertension for both sex in the Nigerian population.</p> <p>2- At the "Materials and Methods" Authors must * Further explain the method of recruitment of the sample of the respondents. * Display the matching criterion between the control group and one of the cases. * Add paragraph "Statistical Analysis". It should be noted the statistical software used and the statistical tests employees.</p> <p>3- In terms of results: I think that it would be interesting to present results * According to the Sex of respondents * According to the control group and the case group There are no ethical issues in this manuscript</p>	<p>One of the limitation of the study was getting the consent of subjects. Many subjects were unwilling to drink raw quail egg.</p> <p>The percentage of the Nigerian population (males and females) suffering from Hypertension has been represented in the corrected manuscript (pages 3-4).</p> <p>The sample of respondents were selected during a visual screening exercise in the University of Benin, Edo State, Nigeria.</p> <p>A paragraph on statistical analysis has been included in the corrected manuscript, with the statistical software and tests used. (See pages 7&8) The results were presented according to the experimental groups (ocular and systemic hypertensive subjects) matched with the (normotensive subjects) control group.</p> <p>The results are presented according to the control gap and the case group. "Eva Water" is natural pure water produced by Nigerian Coca-Cola Bottling Company</p>
Optional/General comments
