

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Journal of Advances in Medical and Pharmaceutical Sciences
Manuscript Number:	Ms_JAMPS_29537
Title of the Manuscript:	EFFECT OF RAW QUAIL EGG ON INTRAOCULAR PRESSURE AND BLOOD PRESSURE OF HYPERTENSIVE SUBJECTS
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>The placebo used in this study (Eva water) is not an adequate placebo for the quail egg because it has no protein intake.</p> <p>The authors cannot assume that their results reflect the specific effect of quail egg and not its protein intake per se.</p>	<p>We are not aware of any placebo that contains protein that should have been administered in this experiment. Since all subjects came in on experimental day, fasting (without breakfast), then it suffices to say that the effect observed was due to the quail egg administered on the subjects.</p>
