PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The author has collected 150 samples and 19 of them yielded <i>Klebsiella pneumonia</i> . Out of these 19 strains, only one was intermediately resistant to imipenem. Upon further experiments that one was not KPC producer. The main focus of this manuscript is on carbapenem resistant <i>K. pneumonia</i> , but the sample size is very small (only one strain of <i>K. pneumonia</i>). Therefore, I suggest to cut it to short communication.	We agree with your suggestion and the paper type to short communication.
Minor REVISION comments		
Optional/General comments
