

SDI Review Form 1.6

Journal Name:	Journal of Advances in Medical and Pharmaceutical Sciences
Manuscript Number:	Ms_JAMPS_31127
Title of the Manuscript:	ANTIBACTERIAL ACTIVITY AND PHYTOCHEMICAL SCREENING OF MANGIFERA INDICA STEM AND LEAF EXTRACTS ON CLINICAL ISOLATES OF METHICILLIN RESISTANT STAPHYLOCOCCUS AUREUS'
Type of the Article	Original research article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	<p>1. Results of phytochemical analysis in Table 1 should not be qualitative but should be quantified. Authors also show the statistical analysis about phytochemical results between leaves and stem bark.</p> <p>2. Statistical analysis between extraction methods is necessary in Table 2. Authors should also represent the negative control in Table2.</p>	<p>Noted</p> <p>okay</p>
<u>Minor</u> REVISION comments	<p>Page 1, line 15: What is statistical analysis meaning? I cannot find any methods about statistics in materials and methods section.</p> <p>Page 1, line 16: The number of significant digits was wrong.</p> <p>Page 3, line 67: Why do authors refrigerate bacteria at 4⁰ C?</p> <p>Page 6, line 132: What is Streptococcus faecalis?</p> <p>Page 6, line 135: Candida albicans is not bacteria.</p> <p>Page 7, line 3: What is Streptococcus pyogenase?</p>	<p>Statistics has been added in materials and methods section.</p> <p>Checked and corrected</p> <p>To preserve the isolates</p> <p>Is another pathogenic bacteria</p> <p>Removed</p> <p>Is pyogenes</p>
<u>Optional/General</u> comments
