

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Journal of Advances in Medical and Pharmaceutical Sciences
Manuscript Number:	Ms_JAMPS_31197
Title of the Manuscript:	Antioxidant, Antiproliferative Properties And Chemical Composition Of The Ethanollic Extract From Leaves And Stems Of Lebanese Anacyclus nigellifolius Boiss
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The manuscript Ms_JAMPS_31197 "Antioxidant, Antiproliferative Properties And Chemical Composition Of The Ethanollic Extract From Leaves And Stems Of Lebanese Anacyclus nigellifolius Boiss" need few considerations regarding some changes in text as pointed out in attached manuscript. The methods used are suitable for the proposed objective and the manuscript follows the expected pattern of scientific writing with a clear objective and consistent conclusion to the obtained results.	- Some changes have been made on the MS as per requested. - For the Keywords, we were usually asked in all our published papers to provide key words which can identify the most important subjects covered by the paper. For that, we choose the mentioned words. - <u>Comment A3:</u> In this study we evaluated the effect of the whole used parts of the studied plant in order to have preliminary idea. In another study we are going to work on the separate part, leaves alone and stems alone. - <u>Comment A6:</u> High antioxidant as it reached more than 90 %. - <u>Comment A7:</u> It is a good method, thank you for giving it. But in this study we cannot apply it as we didn't try it before. So we can use it in another study when realizing step by step the same study and the same DPPH concentrations as done by author.
