

SDI Review Form 1.6

Journal Name:	<u>Journal of Advances in Medical and Pharmaceutical Sciences</u>
Manuscript Number:	Ms_JAMPS_31420
Title of the Manuscript:	Hand Dominance Influences on WAIS-R Block Design performance
Type of the Article	Pilot Study

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	a) The title of the manuscript is not adequate because the results showed no significant difference between the groups. I suggest putting in question form – “Hand Dominance Influences on WAIS-R Block Design performance?” b) There is an error in determining the p value (page 3, line 61).. The p value must be ≤ 0.05. c) “...In our study, our left handed group did not show any significantly better performance which was opposite with the other studies”. Besides the sample size, what are the other hypotheses that could justify the fact that the results of the study are different from previous studies?	a) Title was changed. b) Error was corrected. Please see page 4 in 'DATA ANALYSIS' section. c) Mentioned. Please see page 5 at last part of 'Discussion'.
<u>Minor</u> REVISION comments	a) The dispersion measures (mean and SD) should be described in Table 1 and Figure 1, as well as the p value of the comparisons made between the groups. b) On page 4, line 82 the authors mention that the results found were different from other studies (in the plural), but they mention only a reference	a) Mentioned. b) Corrected. Mentioned. Please see page 5 at last part of 'Discussion'.
<u>Optional/General</u> comments
