SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	**Journal of Advances in Medical and Pharmaceutical Sciences**
Manuscript Number:	**Ms_JAMPS_32303**
Title of the Manuscript:	**EVALUATION OF EFFICACY OF CO-ARTEMISININ IN THE TREATMENT OF PLASMODIUM FALCIPARUM MALARIA IN GOMBE STATE, NIGERIA**
Type of Article:	**Original Research Article**

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	**Authors' response to final evaluator's comments**
The authors have made good improvements. However, some minor changes are still needed to improve even more the manuscript. Definitions shown in the footnote of Table 2 should be placed in the Materials and Methods section, leaving there only the definitions of the acronyms. It should include a citation from where they were taken. If it is a proposed definition from the authors, they should cite from whom they are modifying, justifying the proposed changes. I believe that the research questionnaire added to the end of the manuscript is unnecessary, or should be placed as a supplementary information. The past tense should be used throughout the manuscript. Following are some corrections in the highlighted sections.	**The corrections have been effected as suggested.** **The research questionnaire has been removed as its inclusion is not necessary.** **All grammatical errors have been corrected as suggested.**

Line	It says	It should say
66	Meet	Met
67	Consist	Consisted
69	Will be classified	Were classified
71	Will be used	Were used
72	Will be used	Were used
75	plasmodium	Plasmodium
82	Skip	Skipped
