

SDI Review Form 1.6

Journal Name:	Journal of Advances in Medical and Pharmaceutical Sciences
Manuscript Number:	Ms_JAMPS_33523
Title of the Manuscript:	Phytochemical Screening and Antimicrobial Activity of Chromolaena odorata Leaf Extract Against Selected Microorganisms
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	There exist typographical error.	These have been effected
Minor REVISION comments	The unit of measurement in the table of results should be micro as in sample preparation not milligram. Also, the results for fungicidal activity should be either converted to table as for bacteria or vice versa.	Unit of measurement have been corrected. Converting the fungicidal activity will not project the real pattern of rate of inhibition as the organism has rapid growth rate. Also, the unit of measurement of inhibition of both bacteria and the fungus is not the same here. Hence, I believe this is better presented in this format.
Optional/General comments
