SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	How have you differentiated between asthma asthma and other chronic obstructive pulmonary diseases? Number of test individuals selected for this study is quite less. For this kind of study, we should select atleast 50 patients with control individuals of different age groups in order to draw a significant conclusions. Line 23- correct Hojat b as Hojat and Mahdi	We have added the diagnosis methods of asthma at line 44 to 46 in method. We have included about the small sample size as limitation in discussion, line 158 to 159. It is corrected at line 22.
<u>Minor</u> REVISION comments	Why patients of age group 19-25 only were selected?	We have added the justification in method section at lien 37 to 39.
<u>Optional/General</u> comments	Title may be corrected as - "Effect of body positions on lungs volume in asthmatic: a cross sectional study" If I am not wrong, non-asthmatic individuals were selected as control. What is your suggestions to the asthma patients from your findings?	We agree to correct the title as "Effect of body positions on lungs volume in asthmatic: a cross-sectional study". We have corrected at line 43. We have included the suggestion at line 166 and 168 in conclusion.
