

SDI Review Form 1.6

Journal Name:	Journal of Advances in Medical and Pharmaceutical Sciences
Manuscript Number:	Ms_JAMPS_35168
Title of the Manuscript:	The Frequency of CYP3A5 Expression in a Mexican Population Compared to a Caucasian Population
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	The Manuscript is interesting. There are only few problems: 1) The author will need to format the reference; 2) Why the author didn't include sex information as data on this manuscript? The frequency of alleles and genotypes between sexes should be really relevant. I would recommend the inclusion of sex on the analysis to be added on the manuscript. If race was important (he could find difference), maybe the author will find differences on males and females as well. Unless the author analysed the alleles and genotypes between them and could not find any difference. For that he must include that he could not find any difference and add "Data not shown"; 3) One sentence by line 98 will need to be reversed (attached); 4) Please format the references; Lane 129 table that is a mistake on the N=236 for Mexican and N=237 for Caucasian group.	1) Updated to eliminate spacing as shown in scanned copy 2) Gender data was not recorded for the subjects since the CYP3A5 gene resides on chromosome 7 and is not linked to either of the allosomes (sex chromosomes). 3) Sentence was revised 4) Updated to eliminate spacing 5) Table was corrected
<u>Minor</u> REVISION comments	Please make sure the manuscript format is ok.	
<u>Optional/General</u> comments
