SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	The theme of the research is useful and also brings new knowledge.	
<u>Minor</u> REVISION comments	The abstract should not include titles such as: Aim, Place and duration, Methodology, Results, Conclusion. Introduction, Materials and methods are formally and substantively very well prepared. The text of the manuscript is missing chapter – Results. In a scientific paper the results must be written in the text. Result part can not be replaced with graphs or tables. Graphs and tables should only accompany the textual part. Discussion and references are in order. To the conclusion must be written, whom the results will be forwarded, when and who will implement the obtained results. Proposals for verification of correctness: - The abstract says about 6 groups of Wistar Albino rats designated I, II, III, IV, V, VI. However, in lines 194-203 the groups are identified by the letters: A, B, C, D, E, and F? in the five graphs are groups A, B, C, D, E, and F as well.	

SDI Review Form 1.6

	- Abstract contains information about 60 pieces of female rats in 6 groups (n = 10). In line 158-160 of the manuscript are 6 groups of 8 pieces? - In line 16 are rats weighing between 230-250 grams, but in line 156 rats are weighing between 90-250 grams? - What is right: 540 rev / min, or 540 rpm / min? - In the line 201 - what does it mean 4000 g for 15 minutes?	
<u>Optional/General</u> comments	The research should be continued. The results are extremely significant.
