PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The text is better now. The authors corrected the errors. The abstract is clearly. I put in yellow some corrections (in the body of text – revised). Some spaces were missing but maybe it can be because of the different word format. But it is correct now, by the author and by me (highlights yellow). The yellow highlights are correct now It don't need to be correct again. The authors corrected the figure and deleted the figures that were in repeating the same information. The introduction is more clearly now and the discussion is greater. The conclusion is much better after corrections.
