SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	References 5, 6, 7, 8, 9 are irrelevant as is much of the first paragraph of the Background. The materials and methods are poorly written and the figures and tables need further explanation. The statistical methods used in the comparisons need to be described. What does Jumlah mean? Tables should be redone using an intelligible English. The first 9 paragraphs of the discussion have nothing to do with the purpose of the study and should be deleted. Anyway, the authors have had enough work in the laboratory to get to the results that are interesting.	Ok, thank you, I will check it again and fixed it, jumlah means total in bahasa. The first 9 paragraphs of the discussion section is explained about the hypospadias study which conducted in Sardjito hospital on Yogyakarta city. Thank you
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
