

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Journal of Advances in Medical and Pharmaceutical Sciences
Manuscript Number:	Ms_JAMPS_34294
Title of the Manuscript:	CORRELATION BETWEEN GENE PROMOTER POLYMORPHISM AND ANDROGEN RECEPTOR GENE EXPRESSION WITH HYPOSPADIA INCIDENCE
	THE CORRELATION OF PROMOTER POLYMORPHISM AND EXPRESSION OF ANDROGEN RECEPTOR GENE WITH HYPOSPADIA INCIDENCE
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
1. In line 20 and line 36, exact values of p should be written, 2. Limitations of this study (from line 219 to line 222) should be at the end of discussion section, 3. In conclusion (from line 214 to line 216), "expression of androgen receptor gene is not different in hypospadias and control" is written; this is contradictory to results section, that's why this sentence should be corrected.	1. Ok, I have changed it 2. Ok, i have replaced it 3. The sentences mean that only Androgen receptor expression that has a correlation with hypospasia incidence. If we compared the promoter polymorphysm with expression of androgen receptor in hypospasia incidence, both of them didn't have a correlation
