PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments	Quite interesting manuscript and has scientific sound. However prior for publication better pay attention to some comments. Figure 2 need to correct, the title in the y axis is missing and graph is confusing. If possible less references in the results section.	Thank you. I have made ALL revisions as suggested in the highlighted PDF copy that was sent to me. I have separated the original Figure 2 into separate graphs <u>with short legends</u> for the new Figure 2 and Figure 3, with each graph having their own title, legend, and axis titles. I have removed one reference from the Results section.
<u>Optional/General</u> comments
