SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	1. Abstract title, there is need to review the health professional who will do the interventions by the principal researcher 2. What is the basis of selecting primary and secondary school by the researcher this need to be logical 3. Sampling technique not properly address 4. The researcher fail to address issue of practice in his results while he capture it in his Manuscript title. 5. There is overlapping in table 1. Year of teaching experience, 16-20 and 20years and above were mention instead of >21 6. Method of data presentation need to be in chart example Bar chart for quick interpretation 7. No recommendations at the end of the study. Ethical Issues: No. but the second part of it may require it that is the intervention part.	1. The authors have made the change in line with the reviewer's comment. 2. Unlike teachers in tertiary schools, primary and secondary school teachers play a central role in determining access to education of the students living with epilepsy and may mediate epilepsy-associated stigma. 3. Convenience sampling was employed in this study. 4. The teachers' knowledge and practice of first aid management of seizures was captured in the study. This addressed the issue of practice. 5. We have noted the error and have made the change. 6. We feel presenting the result in prose will allow the reader to fully understand the findings of this study. 7. We have included our recommendations.
Minor REVISION comments	There is need for more literature search to improve on the discussion of the manuscript	
Optional/General comments	Satisfactory but there is need to address the above observation before publishing
