PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	This manuscript presents a case of EPN treated with i.v. antibiotics CSF-1034. The outcome was successful. Indeed this is a rare condition. The presentation of the case is clear, comprehensive and complete. The authors reviewed alike cases thoroughly. According to my opinion this is paper that should be published because of the high mortality of the condition and the difficulty of the treatment.	Ok
