SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The authors mention that 175 parents responded as self-medication practitioners; however, Tables 2 and 3 show 204 Fathers and 204 Mothers. There is no coincidence with those who responded.	We mentioned not 175 parents but 175 respondents (parents or relatives) from whom we went back to true parents (175 fathers and 175 mothers self-medication practitioners and 29 fathers and 29 mothers no self-medication practitioners) even if they were absent during the survey, in order to identify the determinants that influence parental self-medication in children. The title of tables 2,3,4,5 are modified and adapted to table content. For table 5, the columns "No, n(%)" and "Total, n(%)" are deleted Some modifications (highlighted in yellow) are introduced in the manuscript for better understanding: Line 40-41: "characteristics of the respondents, the reasons of self-medication practice " became "characteristics of the respondents, socio-demographic determinants and reasons of parental self-medication practice" Line 54-58: "For each child, ...true parents" This section is introduced for more comprehension between 175 respondents self-medication practitioners from whom we went back to true parents (175 fathers and 175 mothers self-medication practitioners and 29 fathers and 29 mothers no self-medication practitioners). Self-medication practitioners are considered as exposed and no self-medication practitioner are considered as non-exposed to self-medication. Line 90-91: For more understanding we added "self-medication practitioners and 29 fathers and 29 mothers no self-medication practitioners)" The titles of table 2, 3, 4 and 5 are modified for more understanding Table 5: The columns "No, n(%)" and "Total, n(%)" are deleted
Minor REVISION comments		
Optional/General comments
