

SDI Review Form 1.6

Journal Name:	Journal of Advances in Medical and Pharmaceutical Sciences
Manuscript Number:	Ms_JAMPS_44526
Title of the Manuscript:	Prevalence and Risk Factors of Potential Drug Interactions in Hospitalized Cardiovascular Patients Using Three Knowledge Bases
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments	Highlight Iatrogenic diseases due to ADRs of multiple drugs... e.g Like increase in uric acid levels by Ace inhibitors or ARBs , also by Metoprolol , besides thiazide....	Thank you for your valuable insights and recommendations. Examples of iatrogenic diseases caused by cardiovascular drugs were added in the introduction section after line no. 63 with a reference (Darchy B, et al. <i>Arch Intern Med.</i> 1999;159(1):71-8.): Numerous cardiovascular drugs can induce iatrogenic cardiac illnesses such as diuretics which could cause hypo- or hyperkalemia or ACEIs (angiotensin converting enzyme inhibitors) that could induce acute renal failure.
<u>Optional/General</u> comments	Role of pharmacists in identifying or avoiding filling prescriptions which have gross error.. prescription audit is must and evidence based practice of medicine be highlighted...	- The role of pharmacists in general was mentioned in the discussion and conclusion. - Audit cycles were recommended in the conclusion. - Evidence based practice mentioned in introduction: "Good grasp of evidence-based medicine can allow for safer drug use"

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
