

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Journal of Advances in Medical and Pharmaceutical Sciences
Manuscript Number:	Ms_JAMPS_34294
Title of the Manuscript:	CORRELATION BETWEEN GENE PROMOTER POLYMORPHISM AND ANDROGEN RECEPTOR GENE EXPRESSION WITH HYPOSPADIA INCIDENCE
	THE CORRELATION OF PROMOTER POLYMORPHISM AND EXPRESSION OF ANDROGEN RECEPTOR GENE WITH HYPOSPADIA INCIDENCE
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The abstract must be rewritten. It does not cite the number of patients with hypospadias and controls. In the Material, both in the Abstract and in the main text, the PCR sequencing technique must be explained. References 5, 6, 7, 8, 9 are irrelevant as is much of the first paragraph of the Background. The first paragraph of the Background should be excluded or modified. Figures and tables should be cited in the text. The first 9 paragraphs of the discussion have nothing to do with the purpose of the study and should be deleted. The discussion should only be about the purposes of the work and about the results of PCR techniques. English is difficult to understand. The article must be rewritten by someone whose native language is English.
