

SDI Review Form 1.6

Journal Name:	Journal of Advances in Medical and Pharmaceutical Sciences
Manuscript Number:	Ms_JAMPS_38319
Title of the Manuscript:	REVERSIBILITY CAPACITY OF AQUEOUS EXTRACT OF MORINGA OLEIFERA LEAF ON CYCLOPHOSPHAMIDE INDUCED TOXICITY IN MALE WISTAR RATS
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Identification of the plant is missing which is mandatory before extraction. Do write botanical number/identification number of the plant. How can it be sure that the plant used in this study was Moringa oleifera.	
Minor REVISION comments	Although WBCs, Lymphocytes, etc, are component of immune system but others major component of immune system for instance T-cells and B-Cells were not included in this study. Though Moringa oleifera reversed the toxic effect on hematopoietic system or prevented the toxic effects of cyclophosphamide on different cells of hematopoietic system which helps in boosting the immune system. Do write about hematopoietic system as well and its role in defensive mechanism of the body in the intro or discussion section. one of the suggestion is : Other groups could be included in this study in which Moringa Oleifera should have given alone (125,250,500mg/kg) to see the difference as compared to control or if the study was done before on this herb used alone for the same purpose, do mentioned it in the discussion section along with reference.	
Optional/General comments	It is an excellent study and a good effort by author.
