PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
This manuscript just indicated that baseline or follow up monitoring of renal impairment and electrolyte imbalance was performed in only 2.8% or 2.2%, respectively, in 2 hospitals of Akwa Ibom state, Nigeria. These contents just show observational limited results in the confined location. Therefore, unfortunately, it is considered that academic value is poor for the readers.
