| <u>Compulsory</u> REVISION comments | The result of antimicrobial activity was not compared with the standards under C. albicans. There are lack of suggestion in the conclusion. The results were not sufficient and lack of convincing. The supported results were not even explained with previous report. Number of organism tested were quite few. The phytochemical report was off no used | The standard drug for <i>C. albicans</i> was not available in the institution or other institutions in the country. Additional statement in now included in the conclusion We have included all the results obtained and tried to correlate our results with some previously reported results as indicated in the manuscript. We have used whatever available organisms in the lab. The phytochemical results give some inferences on the bioactivity of the plants |
