

Editor's comment:

The manuscript contains a large number of English language errors. Many of those would have been easily picked up by running a simple spell-check on the document.

Please see attached document with highlighted areas corresponding to the errors listed below.

Line

7 - Sentence is incorrect. Suggestions: "Carcinosarcoma is a mixed malignant biphasic tumour representing a rare entity"

8 – "mesenchymal" is preferred instead of "mesenchymatous"

9 – "with a number" and "in the hundreds"

18 – "the outcome is poor" is preferred

28 – "types"

32 – Unclear; probably meant "commonly seen in uterus but ovarian location is a rare entity"

34 – "The majority"

40 – "associated"

41 – "an"

46 – "were reported", "The majority"

50 – “The majority”

51 – “occurs”

60 – “suggests”

70 – “metaplastic”

76 – “may be found”

78 – delete “that”

79 – “based”

81 – “leiomyosarcoma”, “Heterogeneous”

84 – “components”

86 – “the majority of cases”

88 – “Homologous”, “components”

100 – “serous carcinomatous components overwhelms and also a predominance of heterologous chondromatous components” is unclear and incorrect; suggest: “serous carcinomatous components are overwhelming and also a predominance of heterologous chondromatous components is noted”

104 – “are identified”

108 – “a minority”

115 – “mullerian-type components”

117 – “pleomorphism”, “cartilage”

118 – “cause diagnostic difficulties” or “make diagnosis difficult”

120 – “is”

123 – “the prognosis of predominantly epithelial and mesenchymal components is still controversial”

Table – “rhabdomyosarcomatous”, “Heterologous”

133 – “myoglobin”

136 – “immunostain”

148 – “tends”, “and”, “as”

149 – “The majority”

152 – “ascites”

154 – “exclusively occurs”

155 – delete “occur”; “Metastases”

156 – “involve”, “showed”, “increased”

159 – “present”

164 – delete “in”

165 – “ascitic”

176 – “ascitic”

178 – “ascitic”, “yields”, “the majority

179 – “definitive”, “is”

184 – “oophorectomy”

187 – “oophorectomy”

192 – “still not”

194 – “To”

195 – “have been used”

197 – “there has been”

206 – “increased”

207 – “Literature”

217 – “cisplatin”

229 – “of”, “with”

234 – “disease”, “was identified”

236 – “compared to”

238 – “the majority of”

241 – “lack of differentiation”

247 – “more”

248 – “there is”

249 – “carcinosarcoma”

250 – “patients”

252 – “had a median”

253 – “compared to”

Table – “Advanced”

258 – “the majority”

262 – delete “number of”

263 – “suggest”
