

Editor's Comment:

There are numerous language errors. The authors need to ask a proficient English speaker to review the manuscript.

Line:

- 2-3 Capitalize all nouns and adjectives in the title (as reviewers already requested)
- 3 Camelus dromedarius
- 7 dromedarius
- 11 studies
- 12 "female" rather than "she"
- 13 pictures
- 16 "the camel" rather than "she-camel"
- 19 confirmed
- 23 withstand
- 25 Bedouin (variant: Beduin; bedwin does not exist)
- 28 delete "was"
- 30 medullary
- 37 tubulopapillary acinar
- 39 epithelial
- 40 antibodies
- 42 into
- 46 fibrosclerosis
- 46 intraductal
- 46 delete "which"
- 46 overgrowth
- 53 female camels
- 54 km
- 55 female camel
- 56-57 "one that showed tumor masses was a 9-year-old Butana heavy weight ecotype, early pregnant, non-lactating female camel, and was slaughtered."

64 after indicating several times that camels were female there is no need to keep mentioning it,
camel is sufficient

66 was composed

67 “circumcised”???, you mean “circumscribed”

68 by stalk with

69 diameter is one dimension; if you give more dimensions don’t use the word diameter

73 pictures

74 presented as

74 having

79 bullring???

80 leukocyte

84 tufts

88 were composed

95 anisocytosis

97 were

98 delete “was”

99 metastasis

110 frequent

110 seminoma

111 camiline???

112 bitches

114 Fibroadenomatous

114 synonymous

122 if present

129 fibrovascular stroma

131 and may have

141 tumors

142 neoplasms

146 represents
148 the phrase does not make sense. what do you mean?
150 neoplasms
151 tumors
152 neoplasms
155 are
155 availability
