SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Please also discuss the role of fractionated radiation therapy. For tumors that are large or adjacent to critical structures, SRS (gamma knife) may not be feasible	Added a comment in regards to using radiation and fractional radiation. Although no papers show a results with fractionated radiation, there are some suggesting using fractionated radiation near vital structures including the spinal cord.
Minor REVISION comments	Response rate with chemo tends to be low, the response rate should be reported.	Although no number can be found, it is reported in many papers that adjuvant radiation and chemotherapy has shown no mortality benefit. This was added to the paper.
Optional/General comments	Any information on newer target agents, such as avastin?	Unfortunately, there are no papers that specifically state usage of avastin with psammomatous melanotic schwannoma.
