

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Journal of Cancer and Tumor International
Manuscript Number:	Ms_JCTI_24542
Title of the Manuscript:	Multiple tumors (papillary Carcinoma and fibro-adenoma) in the mammary gland of camel (Camelus dromedaries) in Sudan
Type of Article:	Original research papers

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The authors performed several changes as suggested in the first review, however, for clarity, it is important to pay attention to the following questions: 1-The authors might consider the possibility of including the histopathologic diagnosis of the other 44 animals, since this information would enrich the work. Otherwise, make clear, through the title, that it is a case report. 2-It would be important to include a specific paragraph to clarify the limitations of the work, such as image quality and immunohistochemical study results, although this was mentioned in the “discussion” section. 3-The text requires careful review of typing and punctuation 4-As before mentioned, the text also requires thorough review of the English language, particularly in the construction of paragraphs, which confuses the reader. An example is from line 50 to 57 - "Case report" or line 128-133, where the reader is led to believe that authors performed Cytokeratin immunohistochemistry, when it is actually a reference. It would highly recommend the text revision by a native English speaker,	The new corrections were done in red colour 1- Ok, the details of other 44 samples were added with special emphasis to one sample (multiple tumors) and 8 samples (fibroadenoma). We hope we success to be published as research article. Note, intracystic papillary carcinoma and adenocarcinoma were discussed in another papers (under publication). 2- Ok, we improved the image quality and add a lot of information. 3- Done. 4- Correction was done. As it merely a discussion, we removed the paragraph (128-133) which confused the reader.
