SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	1. The title of the paper should be more concise, I don't think the words " in the Department of Pathology" is necessary. 2. Although this is a descriptive study, which could provide some information for local study, I recommend the authors try to analyse their data with international studies. 3. The presentation of figures should be more artistic, redundant lines should avoided. 4. The last figure, anus should not be considered as colorectal cancers, since it has a complete different from histogenesis below the dentate line.	1. We have deleted "in the Department of Pathology" is necessary" from the title. 2. Attempt has been made 3. This has been done as indicated in the document 4. Data/figures have been edited to eliminate anus
<u>Minor</u> REVISION comments	1. Some sections in the paper should be more carefully edited according to the criteria of the Journal. 2. References should be in uniform.	
<u>Optional/General</u> comments	A nice paper for local information.
