

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Journal of Cancer and Tumor International
Manuscript Number:	Ms_JCTI_26755
Title of the Manuscript:	ROLE OF ALKALINE PHOSPHATASE IN DETECTING LIVER METATATASIS IN BREAST CANCER
New title:	SERUM ALKALINE PHOSPHATASE ALONG WITH IMAGING TECHNIQUES AS A PREDICTOR OF LIVER AND BONE METASTASIS IN BREAST CANCER
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Changes made on the original submission seem to be numerous, but are too difficult to follow; the authors should have highlighted all changes - The title has been changed but still it contains grammatical errors - The Abstract still does not convey the content of the article. - The Introduction still contains unnecessary information. - The Materials and Methods, Results and Discussion sections are still poorly written. There should have been a clear distinction between ALP and imaging, as well as between liver and bone metastases.	Changes have been highlighted. Previous title has been restored and significance of ALP has been described only in relation to liver metastasis because it was confusing to describe significance of ALP in liver and bone metastasis simultaneously. Abstract, material and methods, results and discussion are reviewed. Unnecessary information has been removed from introduction. Thanx for guidance.
