**PART 1: Review Comments**

	Editor's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b><u>Compulsory</u></b> REVISION comments	<b>I insist that the quality of the images is very poor. The macroscopic photo can be improved and the only histological image would be good to have at least two, where the transition between breast tissue and injury resembles. It is imperative to improve the quality of the images.</b>	We improved the quality of the macroscopic photo and added 3 others histological images
<b><u>Minor</u></b> REVISION comments	consider grammatical errors and quality of images	Grammatical errors had been corrected.
<b><u>Optional/General</u></b> comments	The case is interesting and rare.
