PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	What is WDUMPs? The objective would be the detection of KRAS mutations and association with tumor aggressiveness and poor outcome, but there is no comparison with staging or follow-up. Correct typing errors and standardize references in accordance with the guidelines of the Journal of Cancer and Tumor International	It is WDT-UMP / Well differentiated neoplasm of uncertain malignant potential. Only KRAS mutations are evaluated as correlated. Corrections are heightened in text . References are standardized according to the journal requirement.
Minor REVISION comments		
Optional/General comments
