SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	I strong recommend starting with second paragraph and then inserting the first. Re-organize it, please. There are some formatted mistakes underline in red over the manuscript, please correct them. From line 17 to 22 there is too much information for just one reference, please re-phrase it. Line 39: "As authors opinion, PDT could be..." Line 55: "ask for medical help" - when? Line 69: "evaluated visually" - how? No comment was made about symptoms in the clinical case description; it was only mentioned in the discussion section with citation. Re-phrase. Local depilation is obligate? Line 110: "the possibility of repeated repetition" Re-phase. Line 121/22: it is not legible. As it is a clinical report, the discussion should be directed to the clinical conclusions and not to literature conclusions.	I re-organized the paragraphs № 1 and № 2. I re-phrased the information in paragraph № 2. Corrected October, 2013 Visually changed to the clinically. The main clinical symptoms of the disease, which detected in the patient, were irritation, persistent intensifying pruritus of the vulva and presence of a turn the form of a wart or abrasion of a red or white color. No I re-phrased the information. I removed the information. I made additions.
Optional/General comments
