PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	1. Please describe the location of tumor clearly (eg. Below or above the superficial inguinal ring ? cm) 2. Please describe the pain more clearly. (eg. relief or exacerbation factors.....) 3. The mass was fixed around the surrounding tissue during physical examination → any specific finding during operation? Surgical margin free? 4. Pathology: does tumor involve the vessels or lymph? Does the pathological picture of the tumor in the spermatic cord the same as the primary tumor in the pancreas? Please describe the survival time of this patient. How long does patient survival after removal of spermatic cord tumor?	1. I modified the location of tumor clearly. 2. I modified the pain more clearly. 3. Surgical margin was positive. 4. Tumor involved the vessels. the pathological picture of the tumor in the spermatic cord was similar to the primary tumor in the pancreas. 5. I modified the survival time.
Minor REVISION comments	1. English editing should be done 2. High orchiectomy → inguinal approach ? 3. Mark the location of tumor in the figure 1 and 2 4. Delete the words from line 87 to 89.	1. English editing was done by "FASTEK". 2. Yes. 3. I marked the location of tumor in the figure. 4. I deleted the words from line 87 to 89.
Optional/General comments	The authors describe the rare case about spermatic cord tumor metastatic from pancreatic cancer. It is important for all physicians, metastatic tumor should be included in the difference diagnosis of spermatic cord tumor.	Thank you very much.
