**PART 1: Review Comments**

|                                     | Reviewer's comment                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|-------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Compulsory</b> REVISION comments | <ul style="list-style-type: none"> <li>- All the literature cited in the discussion should be introduced in the introduction section. The discussion section should discuss the results of this study with former results, e.g. did the study protocols use different dosages, application forms, applications schedules etc.</li> </ul> <p>Data on side effects are missing. A conclusion that the administration was well tolerated without side-effects data is not correct.</p> | <ul style="list-style-type: none"> <li>- We try in the introduction to give short notes about the problem that arouse our idea of research which is neurotoxicity that happen with oxaliplatin chemotherapy and how the Ca &amp; Mg IV can help this problem to start to show our aim of the work.</li> <li>- But in the discussion section we try to analyse our results and compare them with the results of other researchers in the same scope...</li> <li>- Correction: We analyse the possible causes for the agreement or disagreement with the others result in discussion.</li> <li>- About the conclusion, we correct it.</li> </ul> |
| <b>Minor</b> REVISION comments      | Avoid passive forms                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | Ok, I will try to avoid it but sometimes the flow of the writing obliged me to use this form.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
