

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Journal of Cancer and Tumor International
Manuscript Number:	Ms_JCTI_29776
Title of the Manuscript:	RADIO-INDUCED SARCOMAS
New Title:	RADIATION - INDUCED SARCOMA: A CASE REPORT”
Type of Article:	Case study

PART 2:

FINAL EVALUATOR’S comments on revised paper (if any)	Authors’ response to final evaluator’s comments
The paper is improved very much compared to its first version. 1. In section of “Role of radiotherapy and chemotherapy”, the paper only talked about Radiotherapy, and is lack of information about chemotherapy. 2. Although the definition of radiation induced sarcoma was not well established, its discussion should be included in this paper as it is highly relevant. 3. In section of “Treatment”, treatment options should be discussed in greater detail such as the implications of negative surgical margin, re-radiation toxicity. 4. Despite better organized paper, the grammar and English wording remains a concern. Some inappropriately used words, duplicate sentences, confusing sentences requires further editing.
