SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	NIL	
Minor REVISION comments	Formatting of pages is poor. In Figure 1, there are two sentences present between figure and figure number. In few figures, figure is on one page and figure number is on next page. Tables are also divided in two parts due to poor formatting of pages. Try to use good colour contrast in pie charts so as to differentiate the data clearly. Pie chart is missing from figure no. 12.	
Optional/General comments	There are other factors related to obesity and breast cancer, and few authors found no relation of obesity and breast cancer while there is increased risk of breast cancer in patients with low Serum HDL level. see journal : Anjali Sethi, Deepak Sethi, Dinesh Kumar Barolia. "Breast Cancer: Is Obesity A Risk Factor?" Journal of Evolution of Medical and Dental Sciences 2015; Vol. 4, Issue 96, November 30; Page: 16136-16140, Anjali Sethi, Deepak Sethi. "Co-relation of Breast Cancer and Serum High Density Lipoprotein Cholesterol Level: A Single Centre Study." Journal of Evolution of Medical and Dental Sciences 2015; Vol. 4, Issue 97, December 03; Page: 16224-16228 You may relate it with dietary habits and socioeconomic status.
