PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	In my opinion, the series is too small and should be enlarged. The manuscript is well written but in this form is not useful. The article could be modified in order to obtain a review article with a couple of original case report.	
Minor REVISION comments	1. In the "Results" section, the term "mean" should be replaced by "median". Please, verify this word. 2. In the "Results" section it's not reported what was the type of surgery: laparotomy or laparoscopy? Please, clarify this. 3. In the "Discussion" section, what does NHL state for? 4. In the table 3, what are the values of markers? What does "High" mean? 5. Follow-up data are missing. Please clarify the follow-up period (range) and the median survival.	
Optional/General comments
