Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Please show the relationship between HPV type and histological type by making a new Table. Please show the detail of histological types in HPV DNA negative cases. Ethical issue: Please show IRB approval of this study in the text.	A table to show the relationship between the histological type and HPV type and the histological type in HPV DNA negative cases has been introduced in the result section and discussed. I have included the protocol assigned number from the health research ethics committee of University of Calabar Teaching Hospital, Calabar. I have also corrected typographical errors noticed.
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	This is an important study, but the authors should show the more detail of data indicated above.	I am very grateful for this review.
