

SDI Review Form 1.6

Journal Name:	Journal of Cancer and Tumor International
Manuscript Number:	Ms_JCTI_39255
Title of the Manuscript:	An Immunohistochemistry Proved Extensive Inflammatory Myofibroblastic Tumour of Lung: Response to Crizotinib
Type of the Article	Case study

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	This kind of case report has been already reported. There is no explanation of Crizotinib (dose, side effect, regimen). The patient's name is in Figure 2. Did authors obtain the patient's approval of this Figure? CT Scan after the therapy should be presented.	First of all, thank you for your valuable suggestion. Dose, common toxicities and regimen have been mentioned in the last paragraph of the discussion part. Written informed consent was taken from this patient for Figure 2. Though Crizotinib and other symptomatic medications are Government sponsored, imaging is not free in our radiology department. As party could not afford the total cost of repeat CT scan, only a screening CT was done with a personal request to my friend in radiology, without printing the CT plates, even without registration. With the help of RECIST 1.1, outcome i.e. partial response was determined by measuring the dimensions simply on computer screen.
<u>Minor</u> REVISION comments	English, punctuation should be corrected. All abbreviation should be fully spell out at first appearance.	Corrections done.
<u>Optional/General</u> comments
