PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments	What about Imaging? Is there any cervical ultrasound for your patients? What about Blood work? Any disorder? Thyroid hormones? Edit comments on the table (page 4)	1. All the patients had cervical ultrasound done at our institute. Since it was performed by different sonologist, operator dependent variation in findings might be there and hence we have not included ultrasound findings in our study. 2. Thyroid function test was done in all cases and all of them were euthyroid.
<u>Optional/General</u> comments
