It is also possible for a breast cancer to develop within the duration between each three yearly mammogram (interval cancer) – What does this mean “3 yearly mammogram”? The small numbers continue to be presented in the tables and seriously compromise anonymity. In addition, Chi Square is not appropriate with small cell numbers (less than 5) and often give p values that are too low. Typos and English grammer - continues to have issues. For example, Table 2 “Information” is misspelled and 273 with percent given as “(06.1)	Even if mammogram is done routinely, once in three years, it is also possible for a breast cancer to develop within the duration between one uptake and another (interval cancer) [16]. Done INFORMATION, 273 (96.1)
