Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The aim of the study should include the assessment of practice as in the title In The tool for data collection must be write the authors for these tools Need to added the scoring system for tools of data collection The tools for data collection need some clarifications The Methodology needs validity and reliability The results need table for the relationship between knowledge, practice and attitude	The has been corrected in the abstract. The sources of the tool for data collection have been cited and modification highlighted (lines 108-118). It has also been spelt out that the tool was pretested. A scoring system has been mentioned as well (LINES 126-131). These precisions which were not initially mentioned have been incorporated at the level of the methodology to increase validity and reliability. Dear reviewer, thanks for this suggestion. However, most KAP studies are mainly descriptive. We have integrated a comparative analysis of female and male students as regards certain variables. We find it difficult to conceive a table that shows a relationship between knowledge, practice and attitude. You might be a source of inspiration. Please see attached file (Table 6) whether it means your expectations. We appreciate your valuable contributions. Kind regards.
Minor REVISION comments
