

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Journal of Cancer and Tumor International
Manuscript Number:	Ms_JCTI_43949
Title of the Manuscript:	Histopathologic Patterns of Urological Malignancies in Calabar, South-southern Nigeria: A Ten-Year Review
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
- Concerning table 3, (Urethra); the know urethral lesions are stratified squamous, pseudo-stratified columnar and transitional epithelium in the meatus/fossa navicularis, penile/bulbar/membranous and prostatic urethra respectively. Similar transitions are seen in the female from distal to proximal/bladder neck. In the light of this could the papillary listing be revised? Could this be a <i>papillary transitional cell carcinoma of the bladder with urethral extension??</i> - In CONCLUSIONS/RECOMMENDATIONS....line 192 Please change "will result to "may result"	- The correction has been made in the table. - The correction has been made. Other modifications made in the Discussion and Conclusion segments in line with comments from other reviewers.
