PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
1. Author has rightfully answered all the comments. 2. I have still concern with Ca value in soil. Author said that he/she did not determine it in pre-planting analysis. I would recommend mentioning the Ca value in your soil with reference to literature if possible. 3. Please mention below the Tables, the values in tables are representative of what??? Means or MS 4. I have tried to correct the minor mistakes in revised format of paper.	1. Thank you for the acknowledgement. 2. I was able to make reference to the Calcium value determined by a Masters student in the same location. 3. What the values in the tables represent are now stated below each table as treatment means per plot and not MS.
