PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	This work provided information on genetic variability and path analysis of yield components of <i>Colocasia esculenta</i> (L.) Schott which were scanty. The manuscript could therefore be accepted for publication subject to minor revision as indicated in the comments provided. Line 5 Remove the fullstop written after Schott at the title, because Schott is not an abbreviation. Line 8 Mention the scientific name of taro with the authorities. Line 71- 72 Recast: Pre-planting composite soil samples were collected randomly at the two locations using soil auger at a depth of 0 - 20cm and analyzed for their physicochemical properties. State the diameter of the soil auger used. Briefly state the methods used for analysing the physicochemical properties to enable the reproduction of this work. Line 75 Local names of plants must be written enclosed in quotaion marks e.g., 'Akiri'. Line 127 – 134 Increase the resolution of the two Figures. Line 184 Mention the generic name of this plant <i>V. galamensis</i>. It can only be abbreviated after first	Good comments from the Reviewer. The corrections have been effected to the best of our knowledge. The corrected portions are highlighted in yellow in the revised manuscript. Prasad <i>et al.</i> (1981) is at line 88 of the manuscript.
