

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	American Journal of Experimental Agriculture
Manuscript Number:	Ms_AJEA_27053
Title of the Manuscript:	VARIABILITY AND INTER-RELATIONSHIPS BETWEEN YIELD AND ASSOCIATED TRAITS IN TARO (<i>Colocasia esculenta</i> (L.) Schott.)
New title:	VARIABILITY AND INTER-RELATIONSHIPS BETWEEN YIELD AND ASSOCIATED TRAITS IN TARO (<i>Colocasia esculenta</i> (L.) Schott)
Type of Article:	Original research paper

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Author response important to note that we analysed this experiment location by location and not the way he stated and therefore the author's comments does not apply to us. My response I am unable to appreciate why the author must have multi-environment trials and analyse results location by location and come by that formula for VG and VP. The author must please do the right thing.	This analysis was done location by location and year by year and it is a valid way of analysis and many publications have been reported like this. Our emphasis on this is not to bring out the GxE in this work.
